

XPERT ALERT® (CE)

Indoor Alarm System

When it comes to sump and septic alarm systems, Trust the Expert!

SJE Rhombus® has over **40 years** of providing high quality residential alarm systems to users all over the world. With our exceptional customer service and an industry-leading 5-year limited warranty, SJE Rhombus is the leading choice for protecting your home and valuables!

The Xpert Alert® CE indoor alarm system helps protect your home from potentially costly damage due to flooding, pump failure or freezing pipes. The sleek design of the enclosure, with its unique shape, smooth rounded edges, and large push button with LED light ring, makes this attractive alarm ideal for residential applications.

When the tank level rises, the high water float activates the alarm (audible and visual) to alert you of potentially threatening liquid level conditions. The Xpert Alert® CE alarm features an easy-to-see LED alarm light ring that illuminates red for alarm 1 and amber for alarm 2. The alarm horn can be silenced by pressing the large button, but the LED remains on as long as the alarm condition exists. Once the condition is cleared, the alarm automatically resets. A red "Low Temperature" LED activates when the temperature falls below 4°C (40°F) to help protect against freezing pipes; this can be disabled for installations in cold areas.

FEATURES

- (2) sensor inputs to monitor (2) separate liquid level conditions
- LED alarm light ring alerts you of alarm status; red for alarm 1, amber for alarm 2
- Audible alarm activates with alarm 1, alarm 2, low temperature and low battery chirp
- LED low temperature indicator activates at 4°C (40°F) to alert of potential freezing conditions (green - temperature normal, red - low temperature)
- Low temperature alarm may be deactivated when temperature monitoring is not required
- LED power on indicator (green - primary power, amber - battery backup, red - low battery)
- Large, easy-to-use test/silence button located conveniently on front of alarm; simply press to test or silence alarm
- Includes auxiliary contacts for attachment of remote devices (continues to operate during loss of primary power)
- Battery backup
- Type C plug

PART NO. DESCRIPTION

- **1061018** Xpert Alert® CE, 240V, No Float

Patent Pending
